

Environmental Scientist/Planner: Linear and Energy Development

PS&S' growing Lake Success, NY office seeks an early career to mid-level Environmental Scientist or Planner to join our Environmental Group.

Job Duties and Responsibilities

- Environmental license and permit applications, filing, and support for regulatory approvals associated with energy projects
- Work in multi-disciplined team of engineers, scientists, planners and other technical professionals in assembling regulatory compliant environmental plans and studies
- Prepare EAF, Expanded EA, EIS, and similar environmental review documentation
- Coordinate with client and assist with administration of New York State Environmental Quality Review Act (SEQRA) processes
- Direct client contact for client maintenance and new project development
- Involvement in proposal preparation and business development with key clients
- Interface with environmental regulatory agencies and local government officials, as necessary
- Attend and participate in public meetings and hearings, as necessary

Qualifications and Requirements

- Bachelor's degree in environmental science, environmental engineering, urban planning, or related field required. Master's degree highly desirable
- 3-8 years of relevant post-degree work experience preparing environmental planning documentation and environmental permit applications
- Strong technical writing and communication skills
- Familiarity and experience with preparing environmental documents and regulatory submissions associated with electric substation, distribution, and transmission projects
- Familiarity and experience with the environmental review process and the preparation of documents pursuant to the SEQRA
- Sharp attention to detail, the ability to work independently, and the expertise to prepare and review a variety of technical reports and repackage them for inclusion in environmental reviews and related public documents
- Technical expertise in one or more of the following impact areas highly desirable: wetlands and waterbodies, endangered species, cultural resources, noise, visual resources
- Knowledge and experience of the regulatory requirements associated with Article VII of New York Public Service Law highly desirable
- P.E./AICP or other professional licenses or certifications highly desirable
