

Now in its 35th year, Cameron Engineering is a multidiscipline firm with expertise in Planning and Environmental Engineering, Stormwater/Ecological Restoration, Solid Waste Engineering and Water and Wastewater Engineering, Civil and Structural Engineering, Mechanical and Electrical Engineering, Security/CCTV Engineering, Site Development and Landscape Architecture, Traffic and Transportation Engineering, and Construction Management. With a professional staff of over 110 employees, including 32 Professional Engineers licensed in New York State, three Registered Landscape Architects and four Members of the American Institute of Certified Planners, Cameron Engineering has a reputation as one of Long Island's leading consulting planning and engineering firms.

Cameron Engineering takes pride in its community planning initiatives and the engineering solutions it develops for both municipal and private infrastructure projects - specializing in the preparation of planning, environmental and feasibility studies, site development, codes and ordinances, Environmental Assessment Forms, Environmental Impact Statements, Coastal Assessment Forms and Consistency Certifications. The Firm considers itself a steward of the natural and built environment - responsible for designs to fix what is broken and enhance our quality of life.
